AlcoholEdu for College
2013/2014 Executive Summary

Indiana University-Purdue University Indianapolis
February 2014

© 2014 EverFi Inc. All Rights Reserved.
I. A profile of Indiana University-Purdue University Indianapolis Students' Drinking Behavior
   » What are the drinking behaviors of students before they arrive on campus?
   » How often, where, when and why do your first-year students drink?
   » How do your students compare to students nationally?
   » What is the impact of high-risk drinking on your students?

II. Mitigating Risk and Impacting Culture
   » What did your students gain from taking AlcoholEdu?
   » How can your campus engage students to change the drinking culture?

III. Implications for Your Institution's Prevention Strategy
   » How can these data inform your prevention efforts moving forward?
Highlights from Your Data

This Executive Summary contains data from your institution's 2013 implementation of AlcoholEdu for College. Findings are based on self-report data obtained from 1584 first-year IUPUI students who completed all three AlcoholEdu for College Surveys.

Note: An additional 860 students completed Part 1 of the course, but did not complete all three surveys so were not included in the final data set.

» When measured prior to their arrival on campus, your students' drinking rates are below the national average.

» When measured midway through the fall semester, 12% of IUPUI students reported drinking in a high risk way.

» IUPUI students are most commonly drinking at an Off-campus residence or an Outdoor setting.

» The most common drinking-related risk behaviors that your students engage in are doing shots and pregaming.

» Drinking rates are similar for men and women. Women are drinking in a high-risk way less frequently than men.
Understanding "The College Effect"

Student drinking rates nationally follow a typical pattern: alcohol use generally rises the summer before a student enters college, and then increases substantially after arriving on campus. This phenomenon, known as the "College Effect," is represented by the conceptual graphic below.

*Drinking rate is the proportion of students who have had more than a taste or sip of alcohol in the two weeks prior to the survey.

Mitigating the College Effect

Through evidence-based education and prevention efforts, including AlcoholEdu, institutions can mitigate the impact of the College Effect, effectively flattening the curve that represents growth in high-risk drinking.
A Profile of Your Incoming Students

In looking at the drinking rates of students prior to their arrival on campus (Survey 1), your institution is below the national average for high-risk drinkers. Understanding these pre-college drinking behaviors can help your campus establish appropriate messaging that sets clear behavioral expectations early in the semester.

- **Non-drinkers**: 0 drinks in the past two weeks
- **Light/Moderate drinkers**: 1-3 drinks for women; 1-4 drinks for men on at least one occasion in the past two weeks
- **High-risk drinkers**: 4 or more drinks for women; 5 or more drinks for men on at least one occasion in the past two weeks (includes Problematic drinkers - 8 or more drinks for women; 10 or more drinks for men)

The diagram shows the percentage distribution of drinking categories for IUPUI and the national average:

- **High-risk drinkers**: 13% (IUPUI) vs. 18% (National Average)
- **Light/Moderate drinkers**: 12% (IUPUI) vs. 13% (National Average)
- **Non-drinkers**: 75% (IUPUI) vs. 68% (National Average)

(Includes 4% Problematic)
(Includes 5% Problematic)
Benchmarking Your Drinking Rate Data

The data below shows your first-year student drinking rates measured midway through the fall semester (Survey 3) as compared to the national aggregate for all students taking AlcoholEdu during the same time period.

- **High-risk drinkers**: 12% (IUPUI) vs. 26% (National Average) (Includes 4% Problematic)
- **Light/Moderate drinkers**: 17% (IUPUI) vs. 15% (National Average) (Includes 8% Problematic)
- **Non-drinkers**: 71% (IUPUI) vs. 59% (National Average)

Note: As drinking rates vary from campus to campus, it may be helpful to also compare your rates to those of a peer group (by region, athletic conference, Carnegie classification, etc.). If you are interested in a peer benchmark report, please contact your Partner Service Director.
Examining Gender Differences

Midway through the fall semester (Survey 3), the drinking rates are similar for men and women. Additionally, women report drinking in a high-risk way* less frequently than men.

<table>
<thead>
<tr>
<th>Frequency of high risk drinking in the past two weeks (Drinkers only)</th>
<th>Males</th>
<th>Females</th>
</tr>
</thead>
<tbody>
<tr>
<td>Never</td>
<td>64%</td>
<td>70%</td>
</tr>
<tr>
<td>Once</td>
<td>18%</td>
<td>22%</td>
</tr>
<tr>
<td>Twice</td>
<td>9%</td>
<td>5%</td>
</tr>
<tr>
<td>Three or more times</td>
<td>9%</td>
<td>3%</td>
</tr>
</tbody>
</table>

*In response to the question: During the past two weeks, how many times have you had five or more drinks (for men)/four or more drinks (for women) in a row within a 2 hour period?
Identifying Peak Drinking Days

Understanding drinking behaviors across time may be useful for identifying weekly patterns or targeting highest-risk days/events for prevention and enforcement efforts.

Average number of drinks per day

Note: This is a snapshot of a 3-week period of time during the fall semester. As drinking rates are impacted by academic calendars, campus-wide events, holidays, etc., these rates may not be reflective of drinking patterns across the entire semester.
Where Students Drink

IUPUI students are most commonly drinking at an off-campus residence or an outdoor setting. Every effort should be made to target these particular locations with increased prevention and enforcement initiatives.

<table>
<thead>
<tr>
<th>Location</th>
<th>IUPUI</th>
<th>National</th>
</tr>
</thead>
<tbody>
<tr>
<td>Off-campus residence</td>
<td>63%</td>
<td>41%</td>
</tr>
<tr>
<td>Outdoor setting</td>
<td>10%</td>
<td>7%</td>
</tr>
<tr>
<td>On-campus residence</td>
<td>8%</td>
<td>24%</td>
</tr>
<tr>
<td>Bar or nightclub</td>
<td>6%</td>
<td>10%</td>
</tr>
<tr>
<td>All other location(s)</td>
<td>12%</td>
<td>18%</td>
</tr>
</tbody>
</table>

Data represents student responses collected in Survey 3, 30-45 days after completing AlcoholEdu for College.
In Survey 3, IUPUI students indicated their top 5 most important reasons for choosing to drink (drinkers only) or not drink (all students) on a particular occasion.

**Reasons for Drinking or Not Drinking**

### Drinking Alcoholic Beverages

<table>
<thead>
<tr>
<th>Reason</th>
<th>IUPUI</th>
<th>National</th>
</tr>
</thead>
<tbody>
<tr>
<td>To have a good time with friends</td>
<td>46%</td>
<td>57%</td>
</tr>
<tr>
<td>To celebrate</td>
<td>46%</td>
<td>57%</td>
</tr>
<tr>
<td>Like the taste</td>
<td>29%</td>
<td>24%</td>
</tr>
<tr>
<td>To be more outgoing</td>
<td>25%</td>
<td>36%</td>
</tr>
<tr>
<td>To feel happy</td>
<td>23%</td>
<td>31%</td>
</tr>
</tbody>
</table>

### Not Drinking Alcoholic Beverages

<table>
<thead>
<tr>
<th>Reason</th>
<th>IUPUI</th>
<th>National</th>
</tr>
</thead>
<tbody>
<tr>
<td>I'm going to drive</td>
<td>73%</td>
<td>72%</td>
</tr>
<tr>
<td>I have other things to do</td>
<td>62%</td>
<td>61%</td>
</tr>
<tr>
<td>I don't want to spend the money</td>
<td>61%</td>
<td>56%</td>
</tr>
<tr>
<td>I don't have to drink to have a good time</td>
<td>61%</td>
<td>59%</td>
</tr>
<tr>
<td>I don't want to lose control</td>
<td>54%</td>
<td>51%</td>
</tr>
</tbody>
</table>
Effective prevention includes actively engaging students to reinforce positive behavioral intentions of drinkers and non-drinkers alike. The data below can inform decisions around investments in planning and prioritizing alcohol-free activities.

### This year, your students are most interested in the following activities:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Students</th>
</tr>
</thead>
<tbody>
<tr>
<td>#1 Movie Nights</td>
<td>824</td>
</tr>
<tr>
<td>#2 Live Music</td>
<td>691</td>
</tr>
<tr>
<td>#3 Fitness Classes (pilates, yoga, spinning)</td>
<td>615</td>
</tr>
<tr>
<td>#4 Community Service</td>
<td>569</td>
</tr>
<tr>
<td>#5 Nothing Specific - just a cool place to hang out</td>
<td>541</td>
</tr>
<tr>
<td>#6 Outdoor Adventures</td>
<td>533</td>
</tr>
</tbody>
</table>

In addition, this year 344 students indicated an interest in planning alcohol-free events and activities.

To download the names and contact information of students interested in these activities and others, or to view data on any custom activities you may have added to this exercise, please visit the Student Engagement section of the Hub.
Drinking-Related Risk Behaviors

The most common drinking-related risk behaviors that your students engage in are doing shots and pregaming. IUPUI may consider dedicating educational efforts that highlight the risks associated with these specific behaviors.

Note: Graph represents grouped responses of 5, 6, and 7 on a 7-point scale (1 = not at all; 7 = always) for drinkers only.
Negative Consequences of Drinking

While a majority of students did not experience negative consequences as a result of their drinking, certain behaviors worth noting are detailed below.

Percentages represent the number of students who reported experiencing a particular consequence at any time in the past two weeks.

<table>
<thead>
<tr>
<th>Consequence</th>
<th>IUPUI</th>
<th>National</th>
</tr>
</thead>
<tbody>
<tr>
<td>Missed class, performed poorly on an assignment, and/or got behind in school</td>
<td>19 %</td>
<td>30 %</td>
</tr>
<tr>
<td>Had a hangover</td>
<td>32 %</td>
<td>45 %</td>
</tr>
<tr>
<td>Blacked out</td>
<td>20 %</td>
<td>34 %</td>
</tr>
<tr>
<td>Drove after 4 or more/5 or more drinks</td>
<td>11 %</td>
<td>7 %</td>
</tr>
<tr>
<td>Rode with a driver who had been drinking</td>
<td>15 %</td>
<td>10 %</td>
</tr>
<tr>
<td>Was taken advantage of sexually</td>
<td>9 %</td>
<td>12 %</td>
</tr>
<tr>
<td>Took advantage of someone sexually</td>
<td>7 %</td>
<td>8 %</td>
</tr>
</tbody>
</table>
Gains from AlcoholEdu

AlcoholEdu has enabled IUPUI to provide students with a baseline of knowledge and decision-making strategies around alcohol use.

Exam Scores, Fall 2013

In Fall 2013, students reported that AlcoholEdu...

- Helped me establish a plan for responsible decisions around alcohol: 80%
- Prepared me to identify and/or help someone who has alcohol poisoning: 79%
- Stimulated me to reflect on my personal attitudes and behaviors: 63%
- Changed my perceptions of others' drinking-related behaviors: 60%

Data represents student responses collected in Survey 2, immediately following completion of Part 1 of AlcoholEdu.
Among the 60% of high risk drinkers (216 students) who saw "no need to change the way they drink" before taking AlcoholEdu, 33% (71 students) indicated their readiness to change after completing the course.

Data represents student responses collected just before (Survey 1) and immediately following (Survey 2) Part 1 of AlcoholEdu for College.
Positive Behavioral Intentions

After completing AlcoholEdu, IUPUI students reported an increase in several positive behavioral intentions. Programming efforts aimed at further promoting these behaviors can reinforce the messages students received through AlcoholEdu.

Intention has been shown to be the most important variable in predicting behavior change (Ajzen, 1991).
Guiding Principles for Success

Beyond what the data reveals, there are a number of guiding principles that drive successful prevention efforts.

1. Be intentional with efforts and gather data on whether they succeed.
2. Don't try to do it all - a few targeted interventions can be very effective.
3. Stay attuned to new research to inform your efforts.
4. Implement programs strategically to mitigate costs.
5. Test your messages and strategies against the research base, behavior theory, and your instincts.
6. Develop a comprehensive prevention program that includes complementary efforts.
7. Ground all strategies in data.
8. Make decisions based upon your unique culture, allies, and resources.
You may also request reports that allow you to benchmark your data against that of specific peer groups such as athletic conferences, national affiliations, regional groups and others.

For assistance accessing your online reports, or to request peer benchmark reports, please contact your Partner Service Director.
